"THE TRIANGLE OF LIGHT"		
Gold our Russian mineral deposits.....	108	
The third attempt to resolve the free gold mining in Russia: beginning, middle and continued		
Retrospective view: To the booty of rossynogo gold by individual businessmen.....	111	
It took 594 days.		
Retrospective view: Here are the underused human resources.....	109	
In late November the editorial board of our magazine received a reply to the chief editor's address to the President of Russia in connection with the article "Go Russia!" and invitation to participate in discussion of strategic tasks which should be executed in our country's present and future. Assessments, comments and suggestions may be taken into consideration when preparing the President's Message to the Federal Assembly of the Russian Federation and working out practical plans of the state development, it said in the article. Our editorial board is publishing here both the address to the President of Russia and the reply to it received from the Russian Ministry of Finance. However, the editorial board does not view the reply from the ministry as an answer by the President, since the reply received is not directly relevant to our initial address.		
Retrospective view: Is Gold Start'Up Getting Started?.....	121	
DM/DK magazine staff accepts a proposal to cooperate with the President of Russia. What shall be done for overcoming of recession, underdevelopment, venality and for creation of a new prosperous Russia with an increasing active population and decent life? As an answer to this question the editorial staff and the steering committee of RDMK offer the megaproject named 'The Triangle of Light'.		
Retrospective view: The trailblazers' breakthrough — the answer to globalization challenges.....	129	
The concept of the innovative megaproject "The Triangle of Light" grounds the institutional basis the reduction of shadow turnover of jewelry in Russia in places of production and processing of precious metals and gemstones and in other undeveloped places of the Russian Federation.		
Retrospective view: Direct action law — as soon as possible.		
Open letter to the Chairman of the Federation Council S.M.MIRONOV.....	168	
Business community of the industry draws attention to the necessity of urgent legislative solving of the problem which hinders development of the regions and the entire country. The issue refers to the impairment of civil rights of the population conducting individual business in places of their residence in Siberia, Far East and Far North—namely, it concerns the criminal prosecution of individual artisan gold miners, which fact is especially intolerable in the state of financial and economic crisis.		
"Triangle of Light" substantiates reduction of jewels' shady circulation in precious metals and precious stones mining and processing locations by re_establishment of free-yielding - that is, the right for individual business.
