<p>WTO JEWELERS</p> <p>V.N. KROL (St. Petersburg). We need government's help 14 In his speech at Business News Agency's panel discussion on Nov. 17, 2006, the deputy director of "Yuvelirprom" research institute noted that alongside the overall industrial production growth over the last years the Russian jewelry industry exhibits strong tendency for seamless integration into the world jewelry market. Yet illicit trade in black market production still holds 40 to 60% market share. Russian jewelers rely on the government to do only one thing — make the liberalization of the precious stones and metals market more efficient.</p> <p>RPMG-2006 ДОКУМЕНТЫ И МАТЕРИАЛЫ</p> <p>Eighth international business conference "Russian Precious Metals and Gemstones Market: Today's Situation and Future Developments" (Moscow, November 1 — 3, 2006).....26 RPMG-2006 will be held with a view of the large-scaled historical task, which is facing Russia — the development of modern Russian market economy that will be able to double national gross domestic product by 2010. That's why the specific business proposals of Russian and foreign companies with a view of mutually beneficial cooperation will be also reviewed.</p> <p>S.N. KATYRIN. Facilitate the integration into the world economy.....31 The VP of the Russian Chamber of Commerce and Industry expresses his confidence that the participants of RPMG-2006 will facilitate the further growth of the national precious metals and gems market.</p> <p>M.A. FUKAN. We're ready to support cooperation.....32 The head of the delegation of China's Base and Precious Metals Society speaks on behalf of the society about their readiness to help develop cooperation with the Chinese partners.</p>

<p>E.M. BICHKOV. The problems that are yet to be resolved.....33 The president of the international cooperation center for the manufacturers and consumers of precious metals addresses the problems with the law on precious metals and gems, and disunity between the market regulatory agencies that hampers the growth of medium and small businesses.</p> <p>V.V. RUDAKOV. Now that's some interesting link.....35 The deputy vice chairman of the State Duma Committee of civil, criminal, arbitral and procedural legislation, the President of the National Hydrogen Energy Association, and the chairman of the Russian Consumer Union comments on the industry's most critical issues regarding bureaucratic red tape.</p> <p>P.B. SHELISCH. Now that's some interesting link38 The deputy vice chairman of the State Duma Committee of civil, criminal, arbitral and procedural legislation, the President of the National Hydrogen Energy Association, and the chairman of the Russian Consumer Union comments on the industry's most critical issues regarding bureaucratic red tape.</p> <p>V.M. VLASOV, T.P. KIRBASOVA. The current condition, problems and growth prospects of diamond cutting industry of the Republic of Sakha (Yakutia).....43 The Chairman of the Diamond Council of the President of the Republic of Sakha (Yakutia) and the Executive Director of the "Republic of Sakha (Ya) diamond and jewelry manufacturers' guild" show that the backbone of diamond cutting industry of the Republic is in place and weathers the worst crisis in the world diamond cutting business.</p> <p>V.N. BRAYKO. The problems of alluvial gold mining.....53 The chairman of the Russian Union of Gold Producers suggests a number of state measures to give the gold mining industry a boost that will let it maintain the current gold mining volume over the upcoming years and prevent the industry's collapse.</p> <p>M.Yu. PISKULOV. ("Johnson Matthey", UK). The role of international cooperation in the development of advanced technologies based on platinum group metals57 The General Manager of Johnson Matthey Russia shows how the growth of international cooperation in platinum-group metals manufacturing facilitates the creation of hi-tech competitive production techniques and tackles the environmental issues associated with transportation systems, which are especially problematic for larger cities.</p> <p>V.I. CHALOV. On growth track of national MNCs.....60 Mr. Chalov, Ph.D. and professor of the Russian Academy of Public Services of the President of Russian Federation, addresses various strategic issues in environmental and energy industry that the nascent Northern diamond and gemstone producing MNCs should not ignore.</p>

MARKET**OVERVIEWS AND FORECASTS****"Platinum 2006. Interim review".....67**

Presentation of the "Platinum 2006. Interim review" in Moscow was arranged by Johnson Matthey Moscow representative office and took place on 14th of November in Marriott Royal Aurora Hotel. "Platinum 2006. Interim Review" is Johnson Matthey's latest market survey of platinum group metals supply and demand in 2006, forecasts for the beginning of the 2007, including prospects of the price movements.

Presentations of the review took place at the same time in London, New-York, Johannesburg, Hong Kong, Tokyo and Moscow. Presentation in Moscow was carried out by Rainaldo O'Meara (Market Research Manager UK) and Mikhail Piskulov (General Manager Russia).

MMC NORILSK NICKEL**Consistently improving environmental performance.....98****More than 1 billion euro for environmental issues until 201599****On the same level with the world industry leaders' reports101****ALROSA****Winners receive ALROSA Best Diamond Jewelry Awards102****The company's Board meeting103****About third quarter of 2006 results105****CURRENT EVENTS****Russian jewelry network informs.....106**

Current events of the Russian market of precious metals and stones in November, 2006 are presented by the Russia jewelry network, the leading informative and analytical agency of the Russian diamond and gold-and-platinum branch (<http://www.jewellernet.ru>).

DIAMONDS**The market is thinning but prices go down.....134**

Demand on the world diamond market goes down and supply goes up. Lay-offs overseas.

GOLD**Gold becomes cheaper, mining falls, goldmines multiply.....147**

That's the paradoxical situation in today's gold market. What lies ahead?

CRIME**Stealing Won't Cease.....162**

Criminals' fantasy is boundless. 650,000 diamond miners in a single country is not stealing, it's something else

EQUIVALENT**JOURNAL-IN-JOURNAL****Hydrogen Energy and Platinum-group Metals.....166**

"Equivalent" is a journal-in-journal which highlights on the DM/DK's pages the issues related to the development and implementation of high technologies on the platinum-group metals market in connection with the development of hydrogen energy. It is edited by the Vice President of the Council of Experts for High Technologies, Doctor of Chemical Sciences, Professor A. A. EVDOKIMOV.

A.L. SHILOV, L.N. PADURETS, N.T. KUZNETSOV. Comprehensive research of model alloys for hydrogen accumulation.....167

Scientists of Kurnakov Institute of General and Inorganic Chemistry of Russian Academy of Sciences, headed by RAS academician N.T. KUZNETSOV, present the findings of their new researches.

A.F. CHABAK. Application of palladium in production of catalytic materials to remove oxygen from water and solutions in the energy industry.....169

The President of the Academy of Advanced Technologies "Kurchatov Institute" presents the new technique created in the Academy for production of ion exchange resins based on anion exchange resins.

A.L. DMITRIEV (St. Petersburg). Use of platinum group metals as high-energy catalysts for low-temperature hydrogen oxidation and combustion.....172

The deputy head of "Applied Chemistry" Russian scientific center and the member of the ecological committee of St. Petersburg tells about research of new granulated catalysts made of platinum + iridium based on heat-resistant carrier.

A.A.BLOKHIN, N.D ABOVSKY,.YU.V MURASHKIN (St.-Petersburg State Institute of Technology (technical university), M.A MIKHAYLENKO. (Moscow Representative Office of "Purolite International Ltd.")). Ion Exchange Recovery of Platinum from Waste Ferric Containing Solutions During Conversin of Desactivated Catalytses.....173

Platinum recovery from artificial hydrochloric acid solutions was investigated. Sorption was done from solutions with initial concentrations of elements as the followings: Pt — 9—10 mg/L; Fe(II) — 100 g/L; Cu — 1 g/L. Effective desorption of platinum was performed by acidified solution of thiourea.
